Report Number: 240-119521-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Eurofins TestAmerica, Canton attests to the validity of the laboratory data generated by Eurofins TestAmerica facilities reported herein. All analyses performed by Eurofins TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. Eurofins TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of Eurofins TestAmerica and its client.

RECEIPT

The samples were received on 9/26/2019 9:50 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.9° C.

The laboratory control sample (LCS) analyzed in batch 240-403996 was below the recovery control criteria for multiple analytes. This variance only affects results measured above the reporting limit. A MRL standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. This demonstrates the analyte reporting limit is valid, and it is acceptable to report ND results (non-detects). The samples associated with the LCS were non-detects for the affected analytes; therefore, the results were reported. The following samples are impacted: MW-51_092419 (240-119521-1) and (LCS 240-403996/4).

The laboratory control sample (LCS) for analytical batch 240-403996 recovered outside control limits for the following analyte: Methyl acetate. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data has been reported: MW-51_092419 (240-119521-1) and (LCS 240-403996/4).

There was an MS/MSD analyzed in batch 240-403996 but could not be reported because the associated sample needed reanalyzed in a different batch: MW-51_092419 (240-119521-1).

The continuing calibration verification (CCV) for analytical batch 240-404173 exceeded control criteria for 1,2-Dichloropropane. The samples associated with this CCV were non-detects for the affected analytes. In accordance with the laboratory SOP, a low level CCV at the reporting limit (labeled as an MRL) was analyzed and the affected compounds were detected; therefore the data has been reported. No further corrective action was required: MW-23_092419 (240-119521-2), TW-16-01_092419 (240-119521-4), DUP-08 (240-119521-5), TRIP BLANK (240-119521-6), PW-16-01_092419 (240-119521-7) and (CCVIS 240-404173/2).

The laboratory control sample (LCS) for analytical batch 240-404173 recovered outside control limits for multiple analytes. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported: MW-23_092419 (240-119521-2), TW-16-01_092419 (240-119521-4), DUP-08 (240-119521-5), TRIP BLANK (240-119521-6), PW-16-01_092419 (240-119521-7) and (LCS 240-404173/4).

The laboratory control sample (LCS) for analytical batch 240-404299 recovered outside control limits for the following analyte: Cyclohexane. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data has been reported: TW-16-02_092419 (240-119521-3) and (LCS 240-404299/4).

The laboratory control sample (LCS) analyzed in batch 240-404299 was below the recovery control criteria for the following analyte: 1,1,2,2-Tetrachloroethane. This variance only affects results measured above the reporting limit. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. This demonstrates the analyte reporting limit is valid, and it is acceptable to report ND results (non-detects). The samples associated with the LCS were non-detects for the affected analytes; therefore, the results were reported. The following samples are impacted: TW-16-02_092419 (240-119521-3) and (LCS 240-404299/4).

The laboratory control sample (LCS) for analytical batch 240-404390 recovered outside control limits for multiple analytes. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported: (LCS 240-404390/4).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GCMS SIM)

The samples were analyzed on 10/02/2019 and 10/03/2019.

1,2-Dichloroethane-d4 (Surr) failed the surrogate recovery criteria low for MW-23_092419 (240-119521-2). Refer to the QC report for details.

1,4-Dioxane failed the recovery criteria low for the MS of sample DUP-08MS (240-119521-5) in batch 240-403637.

1,4-Dioxane exceeded the RPD limit for the MSD of sample DUP-08MSD (240-119521-5) in batch 240-403637. Refer to the QC report for details.

Internal standard (ISTD) response for the following samples were outside control limits: DUP-08 (240-119521-5), (240-119521-C-5 MS) and (240-119521-C-5 MSD). The sample was re-extracted and/or re-analyzed with concurring results, and the original set of data has
