Arcadis Project No.:
MI001454

Subject:
Ford Livonia Transmission Plant – Waste Management Generation
Livonia, Michigan

Arcadis of Michigan LLC (Arcadis), on behalf of Ford Motor Company (Ford) has prepared this Memo to notify the Michigan Department of Environment, Great Lakes, and Energy (EGLE) on the increase in waste generation associated with the Remedial Investigation (RI) and Vapor Intrusion (VI) Response Activity Plans for the Livonia Transmission Plant.

To date, Arcadis has provided notice to EGLE that approximately 250-265 55-gallon drums will be generated through implementation of the RI and VI Response Activity Plans.

At this time, a total of 395 55-gallon drums have been generated through offsite shallow groundwater monitoring well installation and ongoing offsite pre-emptive vapor mitigation response.

This memo provides notice that ongoing response activities will generate an estimated 200 additional 55-gallon drums.

If you have any questions, please feel free to contact me at 269.579.5402 or kristoffer.hinskey@arcadis.com. We look forward to continuing our partnership with you on this project.

Sincerely,

Arcadis of Michigan, LLC

Kris Hinskey
