ENVIRONMENT, GREAT LAKES, AND ENERGY
WARREN DISTRICT OFFICE

LIESL EICHLER CLARK
DIRECTOR

December 11, 2020

Ford Motor Company
c/o Mr. Todd Walton
290 Town Center Drive, Suite 800
Dearborn, Michigan 48126

Dear Mr. Walton:

SUBJECT: Re: Utility Corridor Evaluation Revised – Addendum
Received Date: December 04, 2020
Ford - Livonia Transmission Plant (LTP)
36200 Plymouth Road, Livonia, Wayne County, Michigan
Consent Decree No 2:1712372-GAD-RSW (CD)
Site ID No.: 82002970

The Department of Environment, Great Lakes, and Energy (EGLE), Remediation and Redevelopment Division has reviewed the “Utility Corridor Evaluation Revised – Addendum” submitted by Arcadis of Michigan, on December 4, 2020. Section 13.2 of the Consent Decree requires EGLE to review the submission and (a) approve the submission; (b) approve the submission with modifications; or (c) disapprove the submission and notify the Defendant of the deficiencies in the submission.”

Based on EGLE review of the proposed additions to the scope of work, the submittal is approved with the following modifications:

- Ford will develop an interim remedial action plan for the LTP concurrently with workplan implementation.
 - The interim remedial action plan will investigate and evaluate all receptors that the utility corridors impact, where soil-gas is above site-specific criteria. If the proposed sampling detects exceedances of the site-specific criteria at the approved sampling locations, additional sampling should continue until the extent of the soil-gas in the utilities is delineated and all connected receptors evaluated. This should be conducted anywhere necessary, both on-site and off-site.
- In the event of site-specific criteria exceedance entering a building or directly adjacent to a building, measures to protect receptors should be implemented immediately to mitigate any potential risks to the inhabitants of the structures.

It is expected that Ford and their contractors will implement this work on an expedited basis and complete the work within the calendar year. If you have any questions, concerns, or would like to meet with EGLE to discuss, please contact me at algerb@michigan.gov or 586-623-2839.

Sincerely,

Brandon Alger, Geologist
Warren District Office
Remediation and Redevelopment Division
